

QHSM

VanEck MSCI International Small Companies Quality (AUD Hedged) ETF

Fund Description

QHSM gives investors a diversified portfolio of 150 international developed market small-cap quality growth securities with returns hedged into Australian dollars. QHSM aims to provide investment returns before fees and other costs which track the performance of the Index.

MSCI World ex Australia Small Cap Quality 150 100% Hedged to AUD Index measures the performance of a quality growth strategy by identifying the largest 150 stocks based on the free-float market capitalisation ("FMC") of the securities in the MSCI World ex Australia Small Cap Index tilted by the quality score, at rebalance. The quality scores are based on three main fundamental variables: high return on equity, stable year-over-year earnings growth and low financial leverage.

An investment in the ETF carries risks associated with: ASX trading time differences, financial markets generally, individual company management, industry sectors, foreign currency, country or sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index. See the PDS for details.

Holdings: Holdings data shows the direct investments of the VanEck MSCI International Small Companies Quality ETF (QSML), the underlying fund into which QHSM primarily invests to obtain exposure to the securities in the index. The percentage holdings of QSML and QHSM will vary slightly because of the cash and forward positions present in QHSM.

Source: FactSet. Price/Earnings Ratio is the weighted average of the last closing price of each portfolio security divided by the last twelve months' earnings of the security. Price/Book Ratio is the weighted average of the last closing price of portfolio security divided by the book value of the security. Market Capitalisation of a publicly traded security is calculated by multiplying the security's last closing price by the total number of its shares outstanding. Dividend Yield is the weighted harmonic average of each portfolio security's distributed income during the prior twelve months before Management fees.
