The table above shows past performance of EMKT from 10 April 2018. Effective 1 June 2022 EMKT's reference index changed from the MSCI Emerging Markets Diversified Multiple-Factor Index ("old index") to the MSCI Emerging Markets Multi-Factor Select Index ("new index") without any change to the index methodology. Accordingly, a reference to 'index' in this performance history is a reference to the old index from the inception date to 31 May 2022 and to the new index on and from 1 June 2022. Index performance shown prior to 17 February 2015 is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs incurred in the fund, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

The MSCI Emerging Markets Index ("MSCI EMI") is shown for comparison purposes as it is the widely recognised benchmark used to measure the performance of emerging markets large- and mid-cap companies, weighted by market capitalisation. EMKT's index measures the performance of emerging markets companies selected on the basis of their exposure to value, momentum, low size and quality factors, while maintaining a total risk profile similar to that of the MSCI EMI, at rebalance. EMKT's index has fewer companies and different country and industry allocations than MSCI EMI.
