

## GOAT

## VanEck Morningstar International Wide Moat ETF

## Fund Description

GOAT invests in a diversified portfolio of international developed markets (ex-Australia) 'wide moat' companies selected by Morningstar on the basis of their assessment that they are the most attractively priced with competitive advantages that will deliver excess returns more likely than not for 20 years or more, with the aim of providing investment returns, before fees and other costs, which track the performance of the Index.

The Morningstar Developed Markets ex-Australia Wide Moat Focus Select Index is a rules-based index that comprises from 50 to 100 wide moat companies in developed markets excluding Australia that Morningstar considers are the most attractively priced based on Morningstar's proprietary methodology that considers quantitative and qualitative factors.

An investment in the ETF carries risks associated with: ASX trading time differences, financial markets generally, individual company management, industry sectors, foreign currency, country or sector concentration, political, regulatory and tax risks, fund operations and tracking an index. See the PDS for details.

The tables above show past performance of GOAT from 7 September 2020. Effective 19 June 2023 GOAT's reference index changed from the Morningstar® Developed Markets ex-Australia Wide Moat Focus Index™ ("old index") to the Morningstar® Developed Markets ex-Australia Wide Moat Focus Select Index™ ("new index") with change to the index methodology. Index\* includes the old index performance from 7 September 2020 and the new index performance from 19 June 2023 onwards. The current index performance shown prior to its launch date on 10 May 2023 is simulated based on the current index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of dividends. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Index performance excludes cost of investing in the ETF. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

*These are not recommendations to buy or sell any security.*

Source: FactSet. Price/Earnings Ratio is the weighted average of the last closing price of each portfolio security divided by the last twelve months' earnings of the security. Price/Book Ratio is the weighted average of the last closing price of portfolio security divided by the book value of the security. Market Capitalisation of a publicly traded security is calculated by multiplying the security's last closing price by the total number of its shares outstanding. Dividend Yield is the weighted harmonic average of each portfolio security's distributed income during the prior twelve months before Management fees.
