

VanEck

MSCI Australian Sustainable Equity ETF

GRNV provides investors with a portfolio of international companies, included on the basis of having better ESG and sustainability metrics and credentials relative to their sector peers, according to MSCI. This true-to-label sustainability fund incorporates stringent screening criteria provided by MSCI's best-in-class research.

GRNV

Benefits

True-to-label Australian sustainable equity portfolio

True-to-label Australian sustainable equity ETF encompassing both environmental, social and governance (ESG) and sustainable investing.

A focus on sustainability through positive and negative screens

Incorporates stringent screening criteria provided by MSCI's ESG research.

State-of-the-art ESG leadership approach

Leveraging MSCI's leadership, resources and its ESG data metrics.

Performance

	1 Month (%)	3 Months (%)	6 Months (%)	1 Year (%)	3 Year (% p.a.)	5 Year (% p.a.)	Since Inception (% p.a.)
Price return	1.68	5.81	3.04	10.52	9.49	7.49	3.48
Income return	0.00	1.80	1.76	3.86	3.76	3.69	4.24
Total return	1.68	7.61	4.80	14.38	13.25	11.18	7.72
GRNV index	1.71	7.72	4.99	14.81	13.68	11.59	8.15
MSCI Australia IMI Select SRI Screened Index	1.71	7.72	4.99	14.81	13.68	11.59	9.88

The table above shows past performance of GRNV from 27 April 2016. Effective 25 June 2019 GRNV's reference index changed from S&P/ASX Franked Dividend Index ('old index') to MSCI Australia IMI Select SRI Screened Index ('new index') with a change to the investment objective. The Blended Index* includes the old index performance from 27 April 2016 and the new index performance from 25 June 2019 onwards. The current index performance shown prior to its launch date on 7 June 2019 is simulated based on the current index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of dividends. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Index performance excludes cost of investing in the ETF. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

Key risks

There is no universal ESG criteria nor definition to assess companies, ETFs or other funds and currently, Australia does not have an ESG or sustainability-related investment taxonomy. This means the approach used to determine ESG ratings varies significantly across research bodies, index companies and investment managers, ranging from superficial applications of ESG metrics to more comprehensive approaches. There is the risk that an investor's views and opinions on sustainability or ESG might differ to that of the index methodology which the Fund aims to track or that of VanEck. It is important that an investor considers the PDS, target market determination and supporting disclosures to determine if the Fund aligns with their values and is right for them.
