

VanEck Australian Banks ETF

MVB gives investors exposure to a diversified portfolio of ASX-listed banks and financial institutions.

Our Australian Banks ETF aims to provide investment returns, before fees and other costs, that track the performance of the index.

MVB

Benefits

Diversify across Australian banks

Invest in all the banks and remove single bank risk with one trade on ASX.

Tactical exposure

Targeted investment position to one of the pillars of Australia's economy.

Tax effective income

Australian banks have typically paid high franked income relative to other sectors.

The table above shows past performance of the ETF from its Inception Date and of the Index from its Base Date. Index performance shown prior to its Launch Date is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

The S&P/ASX 200 Financials ex A-REIT Index is shown for comparison purposes as it is the widely recognised benchmark used to measure the performance of S&P/ASX 200 companies in the financial sector ex-A-REITs, weighted by market capitalisation. MVB's index measures the performance of the largest and most liquid ASX-listed companies that generate at least 50% of their revenue or assets from the Australian banking sector with a maximum weight of 20% in each security at rebalance. MVB's index has fewer companies and different financial sector allocations than the S&P/ASX 200 Financials ex A-REIT Index.

Key risks

An investment in our Australian Banks ETF carries risks associated with: financial markets generally, individual company management, industry sectors, stock and sector concentration, fund operations and tracking an index. See the VanEck Australian Banks PDS and TMD for more details.
