ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

Key risks

An investment in the Fund carries risk. The Fund borrows money to increase the amount it can invest. While this can result in larger gains in a rising market, it can also magnify losses in a falling market. The greater the level of gearing in the Fund, the greater the potential loss of capital. The Fund is considered to have a higher investment risk than a comparable fund that is ungeared. Investors should actively monitor their investment as frequently as daily to ensure it continues to meet their investment objectives. See the VanEck Geared Australian Equal Weight Complex ETF PDS and TMD for more details.
