

CNEW
VanEck China New Economy ETF
Fund Description

CNEW seeks to provide investors with access to a portfolio of the most fundamentally sound companies with the best growth prospects in the consumer discretionary, consumer staples, healthcare, and technology sectors that are domiciled and listed in Mainland China with the aim of providing investment returns, before fees and other costs, which track the performance of the Index.

The MarketGrader China New Economy Index consists of the 120 most fundamentally sound companies in the consumer discretionary, consumer staples, healthcare and technology sectors, domiciled in Mainland China and traded publicly in the Shanghai and Shenzhen stock exchanges (A-Shares). The Index seeks to identify the companies in China with the best growth at a reasonable price (GARP) attributes as the best drivers of long-term capital appreciation. The index constituents are selected on the basis of the strength of their fundamentals across four factor categories: growth, value, profitability and cash flow. The index is equally weighted at each of its semi-annual rebalances, giving each company an equal opportunity to contribute to the performance of the overall index.

An investment in the ETF carries risks associated with: ASX trading time differences, China, financial markets generally, individual company management, industry sectors, foreign currency, sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index. See the PDS for details.

The tables above show past performance of the ETF from 8 November 2018. Index performance shown prior to 15 June 2017 is simulated based on the current Index methodology. The change of name in the index was to continue the existing methodology when the original index methodology was changed in September 2021. Results are calculated to the last trading day of the month in China and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.
