

VanEck MSCI Multifactor Emerging Markets Equity ETF

Fund Description

The VanEck MSCI Multifactor Emerging Markets Equity ETF (EMKT) invests in a diversified portfolio of emerging markets listed securities with the aim of providing investment returns, before fees and other costs, which track the performance of the MSCI Emerging Markets Multi-Factor Select Index (AUD) (EMKT Index).

EMKT Index is based on MSCI Emerging Markets Index, its parent index, which includes large and mid-cap stocks across emerging markets countries. EMKT Index aims to maximise exposure to the four factors below while maintaining a risk profile similar to that of the parent index.

- Value:** Companies are scored based on 2 main indicators:
 - Forward Price/Earnings (P/E)
 - Forward Price/Book (P/B)
- Momentum:** Companies are given a higher score if their share price has outperformed the market in the last 2 years and has increased over the last 6 and last 12 months.
- Low Size:** Companies have a higher score if they are smaller, i.e. have a lower market capitalisation than other companies.
- Quality:** Companies are scored based on 5 main indicators:
 - high return on equity (ROE);
 - stable year-on-year earnings growth;
 - low financial leverage;
 - earnings quality; and
 - investment quality

An investment in the ETF carries risks associated with: ASX trading time differences, emerging markets, financial markets generally, individual company management, industry sectors, foreign currency, country or sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index. See the PDS for details.

Index Information

MSCI Emerging Markets Multi-Factor Select Index

Bloomberg index code	NA749434
Index provider	MSCI Inc.
Constituents	--

The tables above show past performance of EMKT from 10 April 2018. Effective 1 June 2022 EMKT's reference index changed from the MSCI Emerging Markets Diversified Multiple-Factor Index ("old index") to the MSCI Emerging Markets Multi-Factor Select Index ("new index") without any change to the index methodology. Accordingly, a reference to "index" in this performance history is a reference to the old index from the inception date to 31 May 2022 and to the new index on and from 1 June 2022. Index performance shown prior to 17 February 2015 is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs incurred in the fund, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher. The MSCI Emerging Markets Index ("MSCI EM") is shown for comparison purposes as it is the widely recognised benchmark used to measure the performance of emerging markets large- and mid-cap companies, weighted by market capitalisation. EMKT's index measures the performance of emerging markets companies selected on the basis of their exposure to value, momentum, low size and quality factors, while maintaining a total risk profile similar to that of the MSCI EM, at rebalance. EMKT's index has fewer companies and different country and industry allocations than MSCI EM.

Source: FactSet. Price/Earnings Ratio is the weighted average of the last closing price of each portfolio security divided by the last twelve months' earnings of the security. Price/Book Ratio is the weighted average of the last closing price of portfolio security divided by the book value of the security. Market Capitalisation of a publicly traded security is calculated by multiplying the security's last closing price by the total number of its shares outstanding. Dividend Yield is the weighted harmonic average of each portfolio security's distributed income during the prior twelve months before Management fees.
