VanEck Australian Fixed Rate Subordinated Debt ETF

FSUB invests in a portfolio of fixed rate subordinated bonds with the aim of providing investment returns before fees and other costs that track the performance of the Index.

FSUB

Benefits

Investment grade subordinated bonds

This Australian first provides investors access to a portfolio of investment grade credit quality fixed rate subordinated bonds issued by leading banks and financial institutions. These securities sit within the regulated capital structure and qualify as Tier 2 Capital.

Diversification and defensive characteristics

Fixed rate subordinated bonds can provide valuable diversification benefits and defensive qualities.

Attractive yield premium

Subordinated bonds generally provide a yield premium relative to senior debt, commensurate with risk.

The table above shows past performance of the ETF from 10 December 2025. Index performance shown prior to 28 November 2025 is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of dividends. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not indicative of current or future performance which may be lower or higher.

Key risks

An investment in the ETF carries risks associated with: subordinated debt, bond markets generally, interest rate movements, issuer default, credit ratings, fund operations, liquidity and tracking an index. See the PDS and TMD for more details.
