VanEck Gold Miners ETF

Fund Description

The VanEck Gold Miners ETF seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the NYSE Arca Gold Miners Index. The Index is intended to track the overall performance of companies involved in the gold mining industry.

The NYSE Arca Gold Miners Index is a modified market-capitalisation weighted index primarily comprised of publicly traded companies involved in the mining for gold and silver. The weight of companies whose revenues are more significantly exposed to silver mining will not exceed 20% of the Gold Miners Index.

An investment in the ETF carries risks associated with: ASX trading time differences, financial markets generally, individual company management, industry sectors, foreign currency, country or sector concentration, political, regulatory and tax risks, fund operations and tracking an index. See the PDS for details.

The tables above show past performance of the ETF from 26 June 2015. Index performance shown prior to its launch date is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

GDX invests directly in the underlying securities that comprise the index. GDX acted as a 'feeder fund' from 9th October 2019 – 11 May 2022 giving investors access to a fund domiciled in the United States. From 26 June 2015 – 8th October 2019, the fund operated as a CDI.
