Global Defence

ETF

DFND gives investors exposure to a portfolio of listed global companies involved in the military or defence industries. DFND aims to provide investment returns before fees and other costs which track the performance of the Index.

DFND

Benefits

Targeted exposure to global defence

Exposure to the largest global companies involved in aerospace & defence, research & consulting, application software and electronic equipment & instruments, that are typically under-represented in benchmarks.

Advancing technological innovation

The defence industry is at the forefront of technological innovation and development as governments require specialised hardware and software creating demand for new technologies including AI and cyber security capabilities.

Supported by rising government defence budgets

An investment in opportunities beyond our borders, with revenues that are not necessarily correlated to general economic cycles, but rather government spending.

The table above shows past performance of the ETF from 10 September 2024. Index performance shown prior to 5 August 2024 is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of dividends. ETF results are net of management fees and costs incurred in the fund, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

Key risks

An investment in the ETF carries risks associated with: ASX trading time differences, financial markets generally, individual company management, industry sectors, country or sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index. See the PDS for more details on risk.
