## Global Listed Private Equity ETF

GPEQ gives investors a diversified portfolio of the 50 largest and most liquid global listed private equity companies. This private equity ETF aims to provide investment returns, before fees and other costs, that track the performance of the Index.

### GPEQ

#### Benefits

##### Global listed private equity exposure

Access to a global diversified portfolio that provides targeted exposure to venture capital, growth and buy-out opportunities.

##### Exposure to an asset class that is generally illiquid

Invest in a transparent portfolio of listed and liquid direct & indirect private equity as well as private equity managers.

##### Private equity provides investors with high growth potential

Private equity has proven to be an attractive alternative source of growth historically commensurate with risk.

#### Performance

The table above shows past performance of the ETF from 23 November 2021. Index performance shown prior to 2 April 2004 is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of dividends. ETF results are net of management fees and costs incurred in the fund, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

#### Key risks

An investment in our global listed private equity ETF carries risks associated with: listed private equity, ASX trading time differences, financial markets generally, individual company management, industry sectors, foreign currency, country or sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index. See the VanEck Global Listed Private Equity ETF PDS and TMD for more details.
