The table above shows past performance of the ETF (Price Return, Income Return and Total Return) from the ETF Inception Date. The Blended Index* shows the relevant index performance from the ETF Inception Date. The current Index (S&P/ASX MidCap 50 Index) performance history is shown for the previous 10 years. Blended Index* performance is shown from the ETF Inception Date.

Results are calculated to the last business day of the month and assume immediate reinvestment of dividends. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Index performance excludes cost of investing in the ETF. Performance data for periods longer than one year are annualised.

*Since 26 July 2016, the fund operates as VanEck S&P/ASX MidCap ETF, and aims to track the S&P/ASX MidCap 50 Index (current investment objective). Prior to 26 July 2016 the fund operated under the name VanEck Australian Emerging Resources ETF and aimed to track the MVIS Australia Junior Energy & Mining Index (old investment objective). In the Blended Index, performance data from 26 July 2016 onwards reflects the fund's current investment objective, while performance data prior to 26 July 2016 reflects the old investment objective.

Key risks

An investment in our mid-caps ETF carries risks associated with: financial markets generally, individual company management, industry sectors, fund operations and tracking an index. See the VanEck S&P/ASX MidCap ETF PDS and TMD for more details.
