VanEck Vectors Morningstar Wide Moat ETF

Fund Description

The VanEck Vectors Morningstar Wide Moat ETF seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the Morningstar® Wide Moat Focus Index™. The Index is intended to track the overall performance of attractively priced US listed companies with sustainable competitive advantages according to Morningstar's equity research team.

The Morningstar Wide Moat Focus Index is a rules based index comprised of at least 40 attractively priced US wide-moats stocks, as determined by Morningstar's time-tested proprietary research. According to Morningstar, wide-moat stocks are companies identified as having sustainable competitive advantages.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for the Fund reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Effective 20 June 2016, Morningstar implemented several changes to the Morningstar Wide Moat Focus Index construction rules. Among other changes, the index increased its constituent count from 20 stocks to at least 40 stocks and modified its rebalance and reconstitution methodology. These changes may result in more diversified exposure, lower turnover, and longer holding periods for index constituents than under the rules in effect prior to 20 June 2016. Performance may be lower or higher than performance data quoted. Fund returns reflect dividends and capital gains distributions. Performance current to the most recent month end is available at vaneck.com.au.
