*Effective 26 July 2016, the fund operates as VanEck Vectors S&P/ASX MidCap ETF, and tracks the S&P/ASX MidCap 50 Index. Prior to the 26 July 2016 the fund operated under the name VanEck Vectors Australian Emerging Resources ETF and aimed to closely track the MVIS Australia Junior Energy & Mining Index. Performance data from 26 July 2016 reflects the fund's new investment objective. Performance history prior to 26 July 2016 reflects the previous objective.

The tables above show past performance of the ETF from its Inception Date and of the Index from its Base Date. Index performance shown prior to its Launch Date is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

Source: FactSet. Price/Earnings Ratio is the weighted average of the last closing price of each portfolio security divided by the last twelve months' earnings of the security. Price/Book Ratio is the weighted average of the last closing price of portfolio security divided by the book value of the security. Market Capitalisation of a publicly traded security is calculated by multiplying the security's last closing price by the total number of its shares outstanding. Dividend Yield is the weighted average of each portfolio security's distributed income during the prior twelve months before management costs.
