

CLNE

## VanEck Vectors Global Clean Energy ETF

## Fund Description

CLNE gives investors a diversified portfolio of 30 of the largest and most liquid companies involved in clean energy production and associated technology and equipment globally. CLNE aims to provide investment returns before fees and other costs which track the performance of the Index.

The S&P Global Clean Energy Index measures the performance of 30 of the largest and most liquid companies with businesses related to global clean energy production, technology and equipment, from both developed and emerging markets.

An investment in the ETF carries risks associated with: ASX trading time differences, financial markets generally, individual company management, industry sectors, foreign currency, emerging markets, country or sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index. See the PDS for details.

The tables above show past performance of the ETF from 8 March 2021. Index performance shown prior to 5 February 2021 ("Launch Date") is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of dividends. ETF results are net of management fees and costs incurred in the fund, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.
