The tables above show past performance of the ETF from its Inception Date and of the Index from its Base Date. Effective 31 July 2017, the index methodology of S&P/ASX Franked Dividend Index changed as per the ASX Announcement made 23 June 2017. Performance data from 31 July 2017 reflects the new methodology. Performance history prior to 31 July 2017 reflects the previous methodology. Index performance shown prior to its Launch Date is simulated based on the previous methodology.

The tables above show past performance of the ETF from its Inception Date and of the Index from its Base Date. Index performance shown prior to its Launch Date is simulated based on the current index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

Source: FactSet. Price/Earnings Ratio is the weighted average of the last closing price of each portfolio security divided by the last twelve months' earnings of the security. Price/Book Ratio is the weighted average of the last closing price of portfolio security divided by the book value of the security. Market Capitalisation of a publicly traded security is calculated by multiplying the security's last closing price by the total number of its shares outstanding. Dividend Yield is the weighted average of each portfolio security's distributed income during the prior twelve months before management costs.
