VanEck Vectors FTSE Global Infrastructure (Hedged) ETF

Fund Description

VanEck Vectors FTSE Global Infrastructure (Hedged) ETF invests in a diversified portfolio of infrastructure securities listed on exchanges in developed markets around the world with the aim of providing investment returns (before management costs) that closely track the returns of the FTSE Developed Core Infrastructure 50/50 Hedged into Australian Dollars Index.

The FTSE Developed Core Infrastructure 50/50 Hedged into Australian Dollars Index comprises securities in developed countries which provide exposure to core infrastructure businesses, namely transportation, energy and telecommunications, as defined by FTSE's International Benchmark Classification.

Only companies with at least 65% of their revenue attributable to core infrastructure activities are included. The weight of each company is then capped to limit the exposure to particular infrastructure subsectors as follows:

- 50% Utilities;
- 30% Transportation; and
- 20% Others eg Pipelines

Individual stocks are capped at 5%

An investment in the ETF carries risks associated with: ASX trading time differences, financial markets generally, individual company management, industry sectors, foreign currency, currency hedging, country or sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index. See the PDS for details.

The tables above show past performance of the ETF from 29 April 2016. Index performance shown prior to 2 March 2015 is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of dividends. ETF results are net of management fees and costs incurred in the fund, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.
