

MVR

VanEck Vectors Australian Resources ETF

Fund Description

The VanEck Vectors Australian Resources ETF invests in a diversified portfolio of ASX-listed securities with the aim of providing investment returns (before management costs) that closely track the returns of the MVIS Australia Resources Index.

The MVIS Australia Resources Index is a pure-play Australian sector index that combines benchmark with blue-chip characteristics designed to capture the performance of the resources sector of the Australian economy.

The Index includes the largest and most liquid ASX-listed companies that generate at least 50% of their revenues or assets from the Australian resources sector, including, for example, mining services and transport companies.

Individual Index components are determined using a stringent rules-based methodology focusing on liquidity, with a minimum of 20 holdings, each with a maximum weighting of 8%.

An investment in the ETF carries risks associated with: financial markets generally, individual company management, industry sectors, stock and sector concentration, fund operations and tracking an index. See the PDS for details.

Performance History

Month End as at 31-Dec-20	1 Mth	3 Mths	6 Mths	1 Yr	3 Yrs p.a.	5 Yrs p.a.	Inception p.a.

The tables above show past performance of the ETF from 14 October 2013. Index performance shown prior to 21 December 2012 is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

Source: FactSet. Price/Earnings Ratio is the weighted average of the last closing price of each portfolio security divided by the last twelve months' earnings of the security. Price/Book Ratio is the weighted average of the last closing price of portfolio security divided by the book value of the security. Market Capitalisation of a publicly traded security is calculated by multiplying the security's last closing price by the total number of its shares outstanding. Dividend Yield is the weighted average of each portfolio security's distributed income during the prior twelve months before management costs.
