

VLUE

VanEck Vectors MSCI International Value ETF

Fund Description

VLUE gives investors a diversified portfolio of 250 international developed market large- and mid-cap companies, with high value scores as calculated by MSCI at each rebalance. VLUE aims to provide investment returns before fees and other costs which track the performance of the Index.

The MSCI World ex Australia Enhanced Value Top 250 Select Index measures the performance of 250 international large- and mid-cap companies selected from the MSCI World ex Australia Index with high value scores relative to their peers at rebalance. Exclusions apply for weapons and tobacco.

An investment in the ETF carries risks associated with: ASX trading time differences, financial markets generally, individual company management, industry sectors, foreign currency, country or sector concentration, political, regulatory and tax risks, fund operations, liquidity and tracking an index. See the PDS for details.

The tables above show past performance of the ETF from 8 March 2021. Index performance shown prior to 15 February 2021 ("Launch Date") is simulated based on the current Index methodology. Results are calculated to the last business day of the month and assume immediate reinvestment of distributions. ETF results are net of management fees and costs, but before brokerage fees or bid/ask spreads incurred when investors buy/sell on the ASX. Returns for periods longer than one year are annualised. Past performance is not a reliable indicator of current or future performance which may be lower or higher.

The MSCI World ex Australia Index ("MSCI World ex Aus") is shown for comparison purposes as it is the widely recognised benchmark used to measure the performance of developed market large- and mid-cap companies, weighted by market capitalisation. VLUE's index measures the performance of 250 companies selected from MSCI World ex Aus based on MSCI value scores, weighted by market cap x value score at rebalance. Consequently VLUE's index has fewer companies and different country and industry allocations than MSCI World ex Aus.

Source: FactSet. Price/Earnings Ratio is the weighted average of the last closing price of each portfolio security divided by the last twelve months' earnings of the security. Price/Book Ratio is the weighted average of the last closing price of portfolio security divided by the book value of the security. Market Capitalisation of a publicly traded security is calculated by multiplying the security's last closing price by the total number of its shares outstanding. Dividend Yield is the weighted harmonic average of each portfolio security's distributed income during the prior twelve months before management costs.
